

OSMOND'S NOTES

LIGHT-UP ZOMBIE HEAD

*

* this one is sort of hard, so ask for help from an older person if you need it.

FIRST OF ALL, Every monster magic person needs to know how to make "PAPIER-MÂCHÉ"!

Monsters of every kind can be made out of this stuff, so let's start there:

PAPIER-MÂCHÉ Recipe:

ripped up strips of newspaper

Mix together in a bowl!

(I also like to add some white glue!)

Now to make the zombie head...

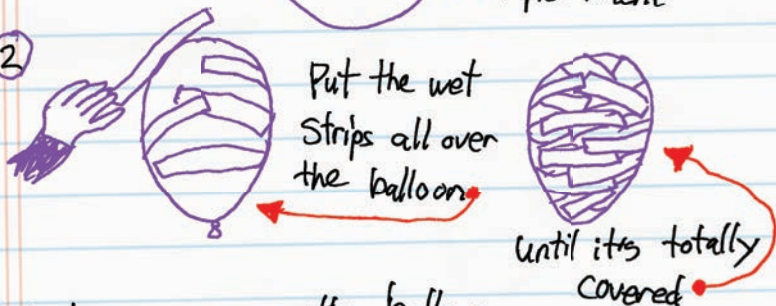

What you need:

- ① One at a time, put the newspaper strips in the papier-mâché

②

- ③ make a nose on the balloon by making a small tent shape out of some of the strips.

- ④ Put the head on a newspaper-covered surface and allow 1 day to dry!

- ⑤ Once the head is dry, poke small holes with a pencil where the eyes would go and then paint the head green (or other zombie color!)

- ⑥ Cut the head open (the balloon will probably pop!) ... just a good slit that you can get your hands inside.

- ⑦ Now you need some old Christmas lights (or new ones) and push the lights inside the head, leaving the plug out

Now push two of the lights through the eye holes

- 8 Now decorate the head with scary teeth and a fright wig (available for cheap at dollar stores or Halloween shops)

- 9 Now plug it in!

Turn out the lights!
Wait for screams!

SCREECH!!
